

PROFOOT MXS

THE ULTIMATE YARN COMBINATION

Profoot MXS is the latest two-tone duo monofilament artificial turf system from Lano Sports. Combining **two different yarn shapes**, one diamond and one rectangular, offers the client exclusive benefits (please see below). However, the two yarns also share common characteristics. First of all, they are **both monofilament yarns** and secondly they are **both made from polyethylene**. Monofilament yarns are known for their **durability** as they are very dense, heavy yarns (up to 230 μ). The benefits of polyethylene yarns are their **softness and flexibility**.

The **diamond-shaped yarn**:

- Durable
- Dark green colour
- Retains its upright position
- Enables the field to play better for longer

The **rectangular-shaped yarn**:

- Supersoft
- Light green colour
- Tips fold over to encapsulate the infill
- Enables the field to retain its comfort underfoot

The **combination** of these two yarn types brings out the best in our MXS range.

The picture left shows that the dark green, diamond-shaped yarn supports the light green rectangular yarn, giving the MXS surface a **super natural look**. As the yarns stay upright, **ball roll** is all the more **consistent**.

As the tips of the light green yarn fold over, the rubber **infill doesn't splash up** when the ball bounces on the surface. This and the supersoftness of the yarn create a skin-friendly and **easy-to-slide-on pitch**.

The combination of these types of yarns makes it **our premier system**, especially designed to give **outstanding play characteristics** and **long-term performance**.
